*The Creative Curriculum*<sup>®</sup> For Preschool and the  
Goals and Objectives of *The Creative Curriculum*<sup>®</sup> Developmental Continuum for Ages 3–5**

*The Creative Curriculum* is a comprehensive curriculum that guides teachers in designing a preschool program in which children learn important skills and content, and develop social competence. The Curriculum shows teachers how to set up a classroom and structure a day, what kinds of experiences to provide for children, how to work with children at different developmental levels, and how to involve families in the program. It shows how teachers guide learning in literacy, math, science, social studies, the arts, and technology while also supporting children’s social/emotional development. Curriculum and assessment are linked with the use of *The Creative Curriculum Developmental Continuum* Assessment System.

*The Developmental Continuum* contains 10 goals and 50 objectives for children ages 3–5. Because children do not achieve an objective all at once, each objective is broken into three developmental steps showing the expected sequence of development for each objective. In addition, there may be children who, in one or more areas of development, are not yet in the typical range. Thus we have also created a forerunner step for each objective. (Forerunners are not shown in this document.) The developmental steps give teachers a way to determine each child’s current development in relation to each objective. This information also allows teachers to decide what specific support and kinds of experiences will enable each child to develop and learn.
